ADOS F55 GENERAL PURPOSE SPRAYABLE

F55 is a high-performance Marine and Auto Trimming adhesive. It has been specially developed for commercial contractors, where it's convenient and economical spraying, combined with its long tack life, make it ideal for bonding large areas.

For making bonds with the following or similar materials: carpet underlay, vinyl flooring, laminated plastics, butynol sheets, timber, metals, concrete and general upholstery.

ADOS SOLVENT N (SOLVENT)

Solvent N is formulated for pre-wiping surfaces before application of contact adhesives, and for cleaning application equipment and thinning. For use with Ados F2, F3, F22, F38, F54, F55, F86 etc. Also for cleaning old, dry film off both water-based and solvent based adhesives.

Use as a thinner. If adhesive thickens owing to evaporation, solvent may be used as a thinner to permit easier spread of adhesive. However, care should be taken not to thin too much as this will affect bond strength.
