

## BOSTIK NZ LTD

### **BOSTIK 1181 CONTACT**

1181 is a trim and general-purpose contact adhesive possessing long open tack time coupled with moderately high heat resistance and excellent bond strength. 1181 is ideally suited for bonding materials such as: rubber/metal, formica/chipboard, leather/leather, leather/rubber resin, soling compounds, cotton backed vinyls, foam, etc.

### **BOSTIK UNIGRIP 999 (PVC-PVC)**

Unigrip 999 is a heat activated polyurethane adhesive used for the assembly of flexible PVC and polyurethane. Unigrip 999 can also be used for the adhesion of inflatable leisure craft and rafts (a special HR grade is made for this purpose). Unigrip 999 bonds exhibit extremely good flexibility, durability, heat resistance and toughness.

### **BOSTIK ULTRAGRIP 777 (PVC-PVC)**

Ultragrip 777 is a polyurethane contact adhesive. It is a water-white, clear, non-yellowing and UV stable adhesive, which has the unique property of being a one-part adhesive, which has good room-temperature tack. Ultragrip 777 gives excellent bonds to plasticised PVC and polyurethane where heat activation is difficult or impractical.

### **BOSTIK NO4 SOLVENT**

Solvent #4 is an excellent general cleaning solvent and degreaser. Invaluable for ensuring a clean, dry, grease free surface prior to applying Bostik adhesives or painting. Use with caution on plastics, many are dissolved by #4 solvent. #4 solvent can also be used to dilute or clean up adhesives, especially Ultragrip 777 and Unigrip 999.
