

BOSTIK NZ LTD

BOSTIK NO2 SOLVENT

Solvent #2 is a cleaning and thinning solvent for contact adhesives such as WB1133 and 1181. It can be used to clean up excess adhesive immediately after application and may often be safe to use where Solvent #4 attacks paint or plastic surfaces.

20ltr	Code#651968

BOSTIK SUPERTAK HIGH PERFORMANCE

For the strongest, one-surface bond you can get from a Bostik aerosol adhesive, this is the choice. Supertak High Performance offers high tack and rapid cure. It also bonds a wide range of materials, including polyethylene and polypropylene. And, with its controlled lace spray pattern, it applies precisely where you want it without misting or overspray.

482g	Code#651999
