EF750 is a EFM (Environmentally Friendly Material) made from EVA.

- 30% lighter than PVC
- Higher Flexibility and Anti-Cracking
- Superior High Frequency weldability
- FDA Certified (FDA 21 CFR 177.1350)

**Suitable for:**

- Drinking water liners/bladders
- Grain covers
- Food containment
- Covers in the Food industry

**Reversible Blue/White colour**
Geoly 530 is the result of years of study and research for a PVC Membrane with high physical strength and a strong chemical resistance for liquid containment.

**The features of Geoly Series:**
- Superior physical strength
- High durability
- Excellent chemical resistance
- Excellent weather proof
- High welding property
- Exceptional water repellency
- Superior puncture resistance
- Superior dimensional stability

**Ideal applications:**
- Land Fill
- Pond Liner
- Stormwater runoff
- Municipal wastewater ponds
- Containment
- Oil storage

Available in Black 187cm wide.

Refer to online specification sheets for further details on these products.
